- PROPOSED CUTBLOCKS 155 ha
- PROPOSED WILDLIFE TREE PATCHES 53 ha
- PROPOSED ROAD PERMITS 1.5 km

NAD 83 UTM ZONE 10
1:15,000

MAINLINE ACCESS:

- 200 ROAD:
-4X4 access to 200 road 30 km
-road brushed in, no industrial use, no maintenance, no changes
- 201 ROAD:
-4x4 access
-danger tree falling, grading to 201-31
-waterbars post-primary silviculture
-no significant changes to access

NEW ROAD PERMIT ACCESS:

- 800 mm CMP at start of RP to be removed post primary silviculture
-waterbars, grass-seeding, quad access

ON-BLOCK ACCESS:

- road network shown is draft
-removal of all culverts, waterbars and grass seeding
-plant tight to edge of roads, possibly plant roads
-maintain quad access to point #1 and point #2 after planting
-use tank-trap and logging debris to try and prevent further quad access past these points

FIRST NATIONS COMMENTS AND CONCERNS:

Plan looks good.

Be aggressive with waterbars and deactivation to limit quad access.

Ensure no 4X4 access onto new road permit.
