FNWL N1I CP101 BLANKET SALVAGE NOTIFICATION FIRE-GUARD LOG DECKS

The recent fire at South Canim/Howard resulted in a significant amount of fireguard being constructed by BC Wildfire Service. At this time there is estimated to be about 10,000 m³ of decked logs, scattered over the area of the fire.

Keneknem has secured a blanket salvage permit and will complete harvesting on this wood. Work will start promptly.

This is the first step in the post-wildfire cleanup efforts. Detailed Blanket Salvage maps will be posted on the Canim webpage under Community Consultation. Maps are also available to view at the Natural Resources Office of the Canim Lake Band.
